### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Van Eperen (US 6,235,137). As best depicted in Figure 13, Van Eperen discloses a method of securing an elastic member to a sheet material using an adhesive, wherein said adhesive is continuously applied on the peripheral surface of the elastic member in an undulating pattern about the axis of strand member. It is clearly evident from Figure 13 that the height of the undulation is greater than the circumferential length of said elastic member. Also, as depicted in Figure 13, the undulating pattern has a uniform cycle.

As to claim 3, the claim is directed to both the use and non-use of tension as pertains to the sheet material and as such, Van Eperen anticipates this claim. It is further noted that Van Eperen suggests that the sheet material can be folded to enclose the elastic member, which suggests a certain degree of tensioning.

Art Unit: 1733

Regarding claim 5, the method of Van Eperen is directed to a variety of manufactured articles, including disposable articles such as disposable diapers and feminine care products.

3. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Kwok (US 6,200,635). As best depicted in Figures 3 and 4, Kwok discloses a method of applying adhesive (24, 25) to an elastic strand (70, 71) and subsequently bonding said strand to a sheet material, wherein said adhesive is applied as a continuous, undulating pattern having a uniform cycle. In particular, the adhesive pattern depicted in Figures 3 and 4 is an S-shape.

As to claim 3, the claim is directed to both the use and non-use of tension as pertains to the sheet material and as such, Kwok anticipates this claim.

With respect to claim 5, Kwok is directed to the manufacture of a variety of articles, including bodily fluid absorbing hygienic articles, such as diapers.
